THERE are enough men in Maysville who know how a thing ought to be done to prevent say "job" in street building. Let the Council have a committee of its own with a committee of citizens to see the work done right, and the people will get what they pay for. The sooner the work is begun the sooner it will be finished-and the longer some of us will stay out of the Cemetary.

The fact that the charter requires the city to pay for the reconstruction of streets ought to make it quite easy for Maywille to have something better than her present canals. After all, however, the owners of "abutting lots" will bear the largest share of the cost, for it is largely the lot owners who pay the taxes that go into the Treasury each year. There is this advantage, however. If the city issues bonds, say to the amount of \$0.000 at \$1 per cent. interest, due 30 years bence, the interest payable annually, the yearly cost will be only \$4,000, whereas it is now nearly double that sum. By paying that what is THE fact that the charter require double that sum. By paying just what is double that sum. By paying that want and each year some \$3,000 put into a sinking fund for the redemption of the bonds. As the bonds are redeemed interest will As the bonds are redeemed interest win cense, and long before the 30 years have passed the entire debt, principal and in-terest, will be wiped out.
